

POWERING VALUE ACROSS YOUR ENVIRONMENT

About Us

agile.E is a small Maryland-based consulting firm helping public, private, and non-profit organizations maximize the mission impact of their existing systems and processes using Microsoft Power Platform, including Power Apps, Power Automate, Power BI, and Dataverse.

Where We Have Worked

- ✓ DHS (GMO, OCIO, OCFO, S&T)
- ✓ CISA (OCIO)
- ✓ USDA (OCIO)

What Sets Us Apart

- ✓ **Proven Success:** Successfully delivered Power Platform solutions in complex, high-oversight public sector environments
- ✓ **Structured Delivery:** Repeatable architecture-first approach minimizing implementation and operational risk
- ✓ **Experience:** 20+ years supporting public sector in process engineering, enterprise architecture, and data management
- ✓ **Built-In Governance:** Established governance framework preventing "shadow IT" sprawl
- ✓ **Cost & Risk:** Short-term, tightly scoped engagements with clearly defined outcomes
- ✓ **Sustainability:** Train-the-trainer model with a structured hand-off roadmap
- ✓ **Geospatial:** Official Esri Partner; seamless ArcGIS integration into enterprise workflows

Our Core Competencies

Architecture

Rapid, standards-compliant development of architecture mapping the key processes, data, and systems and guiding solution design and delivery

Solution Development

Architecture-driven Power Platform development translating business requirements into scalable applications and automated workflows that streamline operations and maintain data integrity

System Integration

Seamless integration of enterprise platforms - including SharePoint, Salesforce, ServiceNow, SAP S/4HANA, OrbusInfinity, ArcGIS, and others - to eliminate data silos and maximize value from existing technology investments

Analytics & Business Intelligence

Real-time operational visibility through automated data pipelines and 508-compliant Power BI dashboards

User Training

Instructor-led Power Platform training sessions complemented by self-paced, on-demand learning modules, tailored to specific user groups and job functions
